**B2E ERP Transformation Service**  
Offering

## **ERP TRANSFORMATION**

Providing intelligence, visibility, analytics,  
and efficiency across every aspect of an  
organisation

**Lead Principal: Tim Buckley**

# ERP TRANSFORMATION OVERVIEW

Business Transformation is at the heart of any major ERP implementation. Our proposition is to lead the transformation of people, process and technology across Finance, HR & Payroll, Procurement and Reporting.

## TYPICAL CHALLENGES

ERP systems have changed the way that organisations work, but too often the reluctance to change entrenched policies and ways of working leads to the new system performing in a sub-optimal way. Without process and organisational change, the benefits promised by the business cases are often not realised and customization of the ERP product can lead to system inefficiencies, and additional cost of maintenance and upgrades.

# UNIQUE SOLUTIONS

B2E Consulting uses a “design with a purpose” approach to provide clients with an integrated team incorporating customer insight, a target operating model, process design, business case, and a detailed implementation road map that it can either implement on its own and/or with partners.
